

# + BioRESCUE

**A CONVENIENT AND FAST ORAL  
TREATMENT PASTE WITH  
UNPRECEDENTED STRENGTH**

**BIORESCUE'S MICRO-ENCAPSULATED, MULTI-STRAIN  
PROBIOTIC PROMOTES IMMUNITY, RECOVERY AND  
IMPROVES DIGESTION**

**IDEAL FOR ANIMALS OF ANY AGE THAT ARE STRESSED,  
SICK OR AT WEANING**

**RAPIDLY ABSORBED, IT DELIVERS POWERFUL  
PROBIOTICS AND VITAMIN E AT UNPRECEDENTED LEVELS**

## ACTIVE CONSTITUENTS

**LACTIC ACID BACTERIA AT NO LESS THAN 1,000,000,000  
CFU/G.**

Enterococcus faecium, Lactobacillus acidophilus, Bifidobacterium longum,  
Lactobacillus plantarium, Pediococcus pentosaceus, Lactobacillus casei,  
Bacillus subtilis.

**TOTAL YEAST AT NO LESS THAN 1,000,000,000 CFU/G:**

Saccharomyces cerevisiae

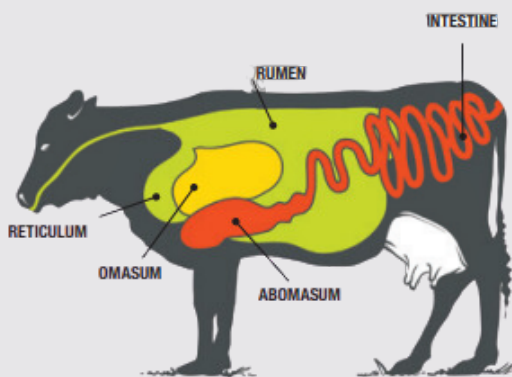

## VITAMIN E:

10 IU/g

Because 70-80% of an animal's immune function is driven from its lower gastrointestinal (GI) tract, getting the right concentrations of probiotics to that sweet spot is key.

Saccharomyces cerevisiae (SC) – has been reported to have positive effects both directly and indirectly on the immune system. Its subsequent biomarkers helps ease the impact of stress and disease.

It has also been shown to be a very strong rumen control agent – allowing the removal of antibiotic-based rumen control agents.

Probiotic supplementation that includes yeast, maintains an immature rumen pH in the neutral range of 6-7.

Host-specific bacteria have specific key receptor sites for each host species that allow for more efficient attaching to the epithelium in the small intestine.  
• Micro-encapsulation ensures passage of the bacteria through the rumen to the lower GI tract.

Bacillus subtilis is a very hardy spore bacteria that has been extensively studied on a genetic and functional level.

## PRICING MARCH '22\*

### BIORESCUE - 80 CC

1 TUBE - \$55  
3 TUBES - \$145  
6 TUBES - \$260

### BIORESCUE - 300 CC

1 TUBE - \$99  
3 TUBES - \$285  
6 TUBES - \$540

APPLICATOR GUN \$50

\*PRICES EX GST AND SUBJECT TO CHANGE

## DIRECTIONS FOR USE:

Apply BioRescue orally on the tongue or mix with animal feed at the following rates:

### COWS:

10 - 15g for off feed cows, at calving, or for stressed, sick or downer cows.

### CALVES:

5 grams at birth, in times of stress, illness, disbudding, and as a re-inoculant post antibiotic treatment.

### LAMBS/KIDS:

2.5 grams at birth, or at times of stress or illness

**FOR ANIMAL USE ONLY**

**USE CALF XTREME FOR A COMPLETE CALF  
REARING PROBIOTIC SUPPLEMENT THAT  
CAN SUPPORT HEALTH AND PROMOTE  
GROWTH AND PERFORMANCE.**

## RESULTS OBSERVED BY CALF REARERS AND DAIRY FARMERS

### OFF-COLOUR TO ON THE FEEDER

"We had an off-colour bull calf the other morning and he wouldn't stand to feed. I gave him 5g of BioRescue, and he was the first calf on the feeder that afternoon."

### BIORESCUE SLAMMED DEATH'S DOOR SHUT

"So, it has [BioRescue] worked. Thanks so much, I can report that the calves that were on death's door last night with one pooping straight blood are up and getting themselves to the feeder unaided. One was bouncing around the pen tonight, and you would never know she was so very sick. I've never seen calves turn around so quickly. I went from having tears streaming down my face when hubby turned up to the calf shed yesterday, to instead having tears of relief and joy tonight. So, thank you. I will be telling my vet what I've used, and definitely passing this information onto other calf rearers."

### HAPPY CALF - HAPPY CALF MUM

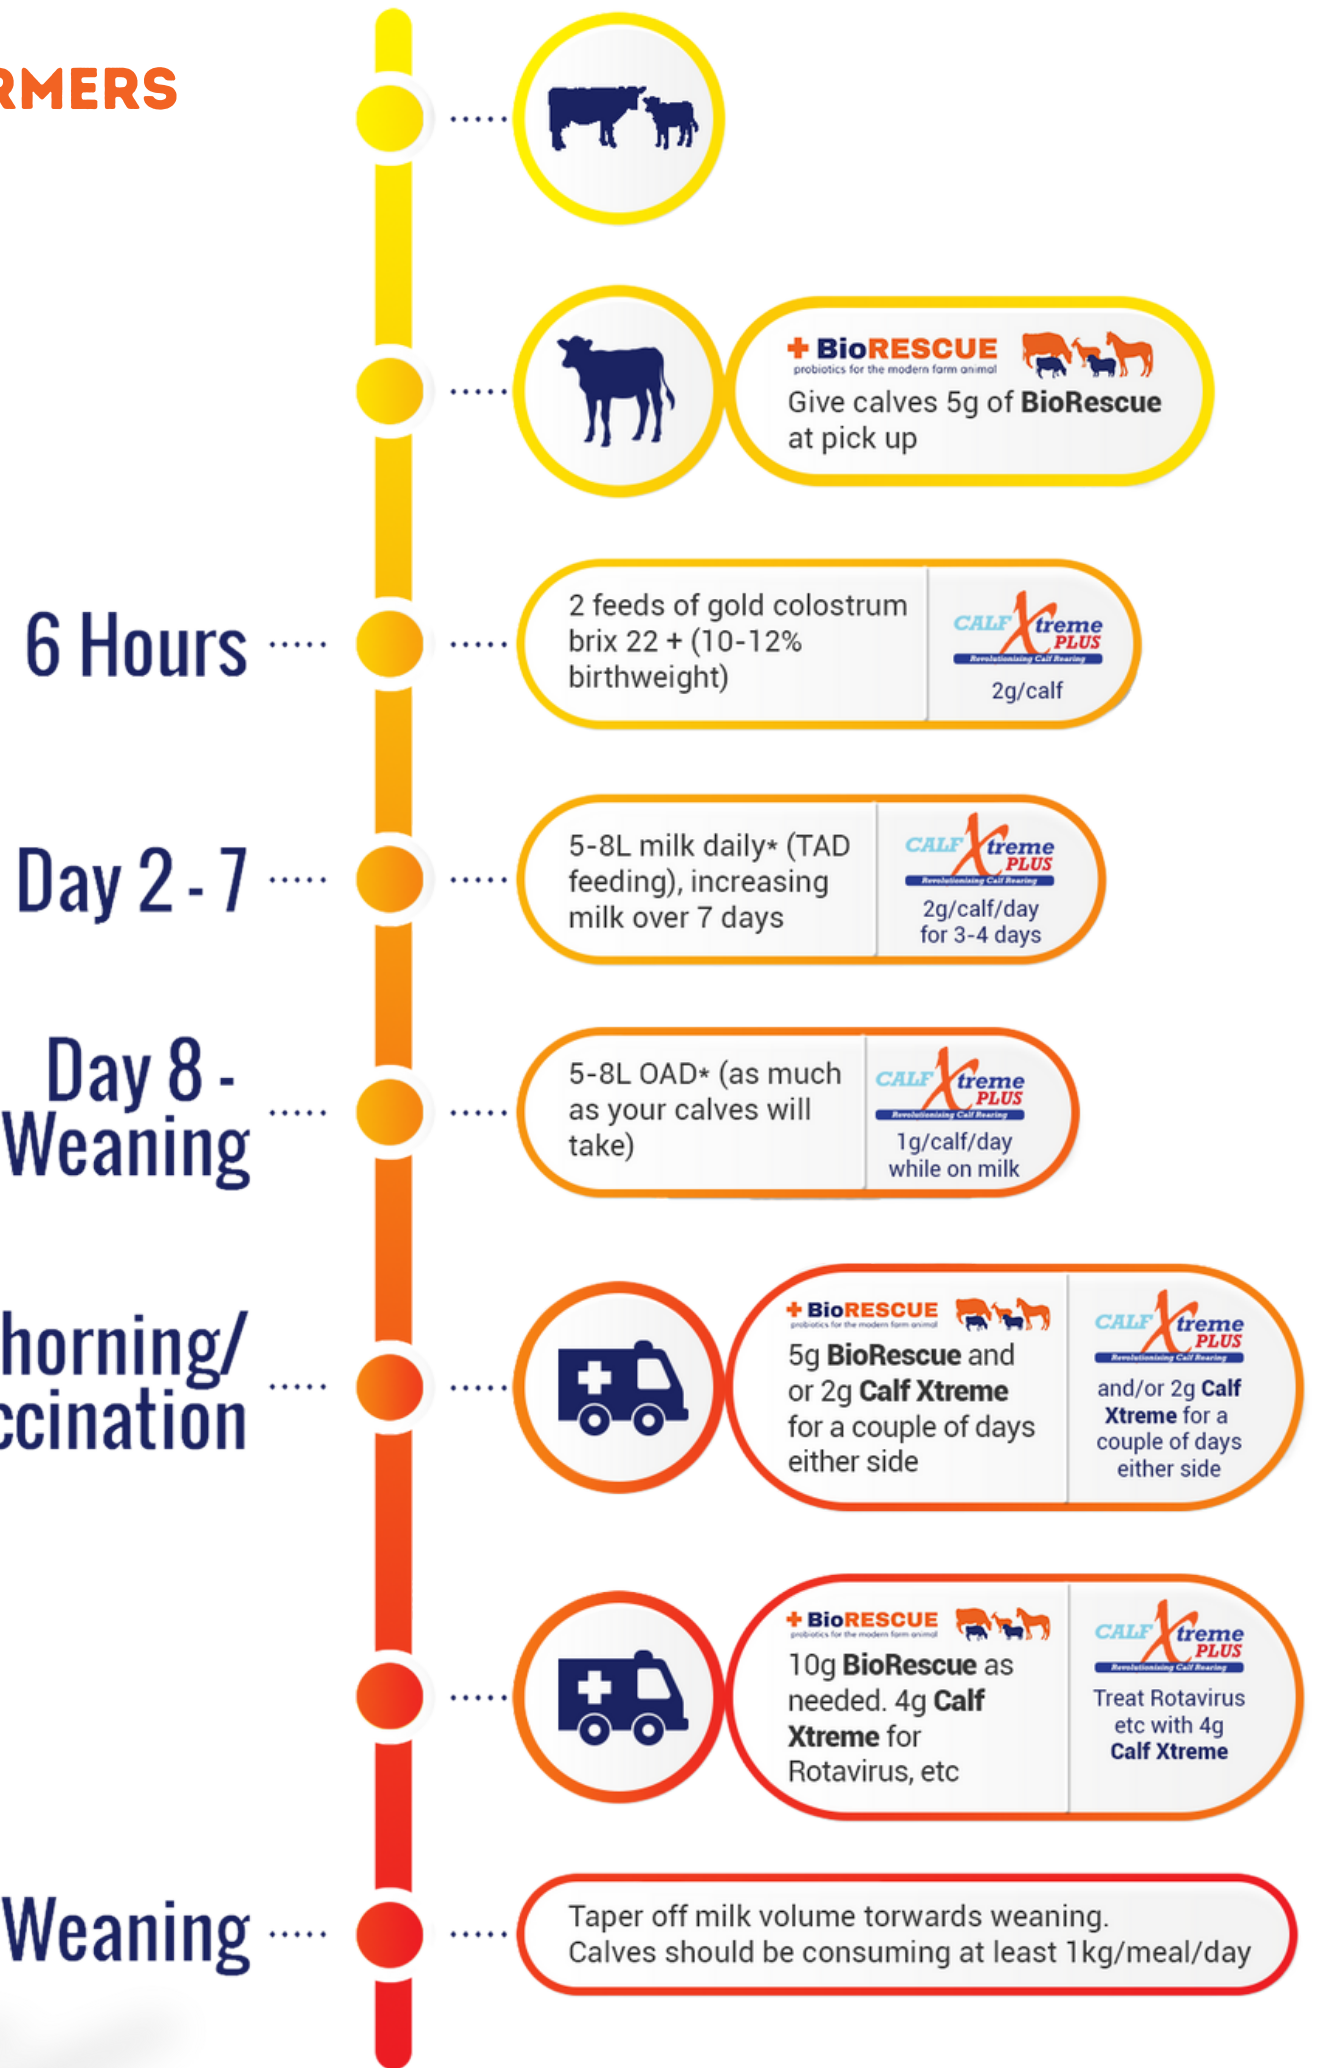

"This paste is legit...I had a calf in the middle pen that wouldn't drink yesterday, and he didn't look happy. I gave him 5g of the BioRescue paste. He was the only one waiting at the gate for milk this morning, and he drunk like a champ."

### FIRED UP RUMEN

"I used a whole tube on a cow who was down with low Phosphorus levels and a pinched nerve too. I gave her the paste on day three, by day four she was eating, and by day six she was up, along with getting her Phosphorus levels right. I reckon the paste got her eating, and that made a massive difference to her recovery. She's now back in the herd and doing great. I'd thoroughly recommend this product."

## The Calf Plan

\* Talk through a plan with us regarding volume and calf breed. Milk powders vary and volumes generally don't apply the same.
