

CALF XTREME

IMMUNE SUPPORT RUMEN DEVELOPMENT LABOUR SAVING BOOSTED GROWTH

ONCE FARMERS EXPERIENCE WHAT CALF XTREME IS CAPABLE OF, THEY HAVE THE CONFIDENCE TO FEED THEIR CALVES HIGHER RATES OF MILK THAN THEY THOUGHT WAS POSSIBLE.

BY DAY 8 MOST CALVES CAN BE FED ONCE A DAY (OAD) AT A HIGH MILK RATE - DO IT ONCE, DO IT RIGHT

 A specific strain of live active dry yeast. (*Saccharomyces Cerevisiae*).
A strong probiotic that stimulates cellulose digesting bacteria, improving fibre digestibility.

5 digestive enzymes working to improve feed breakdown resulting in more efficient feed utilisation. In turn, this directly affects intake and energy levels.

 5 micro-encapsulated bacteria proliferate in the lower GI tract. Strengthening their natural defense systems so they are better able to cope in times of stress and challenge.

Calf Xtreme is organic registered and 100% natural with NIL meat withhold.
THIS PRODUCT DOES NOT CONTAIN RESTRICTED ANIMAL MATERIAL.

ENZYME ACTIVITY

Feed efficiency improvement with cost saving and performance potential is possible through use of combination enzymes and their synergistic effect with other ingredients.

DELIVERED AT A POWERFUL 12 BILLION CFU/DOSE

A 2022 SURVEY SHOWED:

11 DAYS EARLIER - CALVES REACHED WEANING AVERAGE
9.5/10 - CUSTOMERS RATED CALF XTREME FOR SATISFACTION
70% OF CUSTOMERS SAVED \$\$ ON MILK AND MEAL

+ BioRESCUE
probiotics for the modern farm animal

COMPLIMENT CALF XTREME WITH BIORESCUE, A CONVENIENT & FAST ORAL TREATMENT PASTE WITH UNPRECEDENTED STRENGTH

PRICE MARCH '23*

1 KG	\$220	10 - 20 CALVES
2.5 KG	\$510	40 - 50 CALVES
5 KG	\$950	90 - 100 CALVES
7.5 KG	\$1425	140 - 150 CALVES
10 KG	\$1750	180 - 200 CALVES

*PRICES EX GST AND SUBJECT TO CHANGE

CALF XTREME

IMMUNE SUPPORT RUMEN DEVELOPMENT LABOUR SAVING BOOSTED GROWTH

RESULTS OBSERVED BY CALF REARERS AND DAIRY FARMERS

HAPPY WIFE - HAPPY LIFE

"The impact is stretching beyond just the rearing period, with bigger heifers coming in as two year olds and putting more milk in the vat. We see less health problems from birth to entering the herd, improved fertility (more heifers getting in calf and faster) and I now see my wife enjoying calf rearing."

FASTER WEANING - SAVE ON MILK POWDER AND MEAL

"It's helped them transform their system over the last four years and now they feed OAD early on high volumes of milk and see calves grow bigger than ever before.

They're not only weaning their calves heavier and faster but are also saving on meal and milk powder in the process, PLUS making better use of our colostrum when we have it!"

EARLY OAD PAYS FOR ITSELF IN LABOUR

Annette was initially hesitant about trying a once-a-day-system on her Southland farm, but started using Calf Xtreme last year with great success!

She had her calves on OAD after just seven days, down from the usual six weeks with the Southland weather, which resulted in a huge labour saving and also saw calves get to their target weaning weights much earlier than normal."

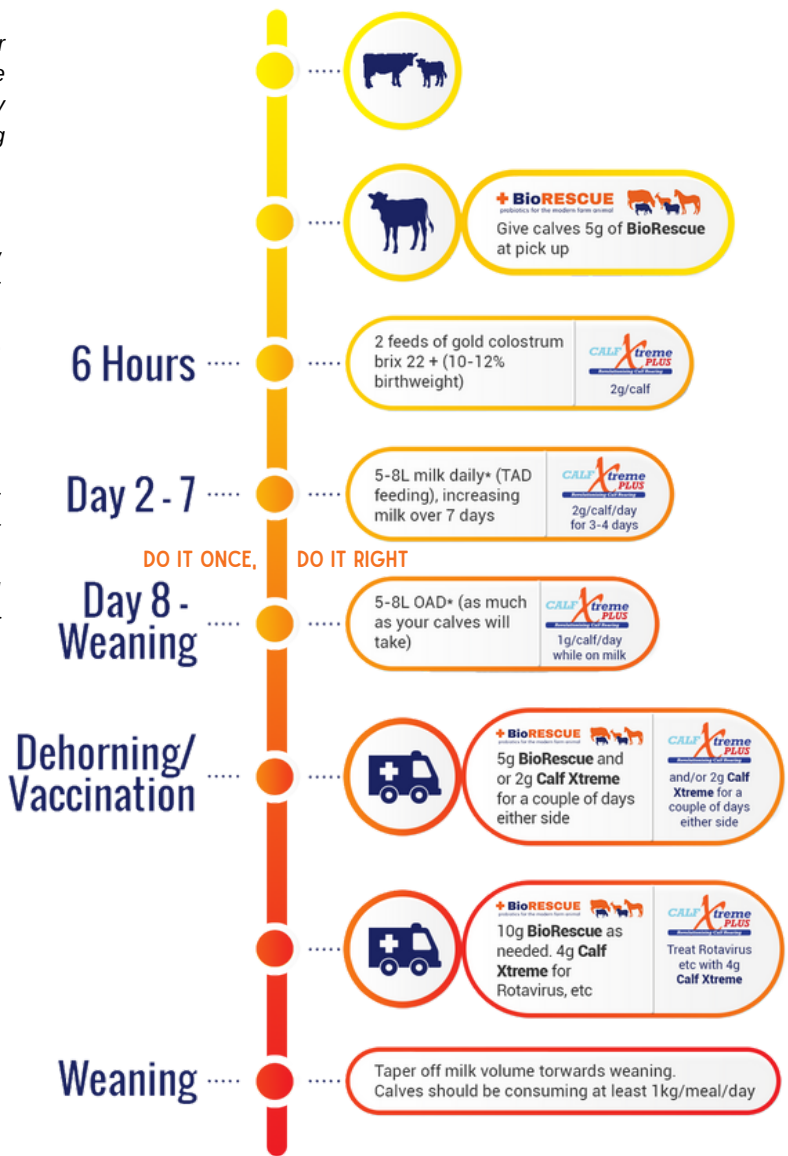

REDUCE STRESS

"It honestly made life during this crazy time so much less stressful - especially knowing they were happy and full being fed OAD!"

BETTER HEIFERS

"I used to feed my heifers 2 litres twice a day for 4-6 weeks and as heifers they produced 74% of mixed aged cows production. Now they get 7-8 litres once a day after day 10 and the heifers are producing 86% of mixed aged cow's production.

The Calf Plan

* Talk through a plan with us regarding volume and calf breed. Milk powders vary and volumes generally don't apply the same.
